ONBOARD TECH:

- Onboard Audio
- Onboard Lighting
- Scent Compressed Air Burst

MULTI CHANNEL CIRCULAR AUDIO ZONING

Taking the term “surround sound” to a whole new level, the HybriDome Theater breaks up the audio system into circular rings with discrete channel speakers along the music and sound effects to float through the space along side the 3D imagery.

MULTI-PROJECTOR AUTO-ALIGNMENT SYSTEM

The single push button auto-alignment procedure analyzes the position and focus of each projector relative to each other making small adjustments to ensure the media remains as crisp and clear as the first day of operation.

EXCLUSIVE THEATER REVEAL

The show begins in a lower smaller-scale theater with rear projection. The content on this smaller-scale screen then seamlessly transitions to the large-scale enveloping media screen as the theater seats physically rise into the air, complimenting the reveal’s wow-factor with visceral movement and excitement. This signature theater reveal of the HybriDome Theater is exclusive to this Falcon’s project.

SEAMLESS WALK-IN LIGHTING

Entry and exit through the attraction are complimented by effective ambient lighting, providing an atmospheric transition between spaces that preserves the integrity of the environment's mood while also ensuring safety for all visitors.

INTEGRATED SHOW SFX (OPTIONAL)

Sensory special effects (SFX) are an optional feature to the attraction that dramatically enhance the immersion and impact of the media content. HybriDome Theater allows for wind, vibration, scent, and water spritz effects to be included in the experience.

AEON INTERACTIVE EXPERIENCE (OPTIONAL)

Introducing AEON Interactivity powered by Falcon's Creative Group. AEON is an optional customizable technology solution that introduces immersive gamification to the ride experience, elevating the attraction to a new dimension of engagement, personalization, and entertainment value.
