A CUSTOM AR SOLUTION DESIGNED FOR YOUR VENUE

Falcon's Vision™ represents the next generation of **engaging** and **interactive** augmented reality (AR) experiences – an **immersive**, **durable**, and highly **customizable** product specifically designed to be **functional**, **hygienic**, and **affordable** for high-throughput location-based entertainment experiences.

Experience a new reality.

INFORMATIONAL FACTS:
The majority of the Hawaiian monk seal population can be found around the Northwest Hawaiian Islands but a small and growing population lives around the main Hawaiian Islands.

ENGAGING

Falcon's Vision™ can enhance a wide variety of location-based entertainment experiences including museums, galleries, zoos, aquariums, and more! Fill your venue with fully dimensional content to provide information, entertainment, storytelling, and other opportunities for engagement. The content itself can be easily added or updated seasonally to keep your experiences feeling fresh and new.

Activate your space.

INTERACTIVE

Breathe life into fossils, dive deeper into aquarium habitats, or enter the worlds of the greatest artists and their masterpieces. Falcon's Vision™ breaks physical barriers and allows users to explore and interact with impossible worlds.

Gamify your venue with a scavenger hunt to foster healthy competition for families and friends. Looking for better wayfinding and navigation? Let Falcon's Vision™ be your guide.

Empower your audience.

IMMERSIVE

The Falcon's Vision™ headset produces an extraordinarily immersive 55° field of view exceeds many other augmented reality devices in the marketplace. The virtual content extends to the furthest edges of the viewing window, ensuring an expansive viewing experience.

The Falcon's Vision™ headset can also be equipped with 3D polarized lenses to add a new dimension to passive stereoscopic 3D media with an augmented reality overlay.

Believe what you see.

DURABLE

Built to last, Falcon's Vision™ is the only AR headset designed specifically for the challenges of location-based entertainment venues. With a tamper proof, water-resistant, shock-absorbing enclosure, and no moving parts, this headset is ready for prolonged and extensive use for any type of venue.

Protect your investment.

CUSTOMIZABLE

Affordable enclosure decal and strap options available.

CUSTOMIZABLE

Highly custom sculpts and material options available.

FUNCTIONAL

The easy to use one-size-fits-all binocular design allows guests to control the pace of their own augmented experiences. With enough battery life to last several hours as well as wireless charging options, Falcon's Vision™ has been engineered with operators in mind.

HYGIENIC

The headset's unique design allows for the facemask component to detach from main electronics, and it is machine washable to maintain sanitation even in high turnover scenarios.

AFFORDABLE

Falcon's Vision™ is a turn-key product tailored to your needs with flexible and affordable pricing options.

Falcon's Vision™ offers scalable multi-platform options to venue owners and operators. While the Falcon's Vision™ headset delivers the most immersive and engaging augmented reality experience, Falcon's Vision™ augmented reality can also be applied to venue-controlled tablets, or made available to download from mobile app stores directly to personal devices.

Achieve your dreams.
